

Stedham with Iping Annual Parish Meeting 23rd November 2021

West Sussex County Councillor Report

Electric Vehicle (EV) charging points

The Council needs to identify where the points are needed. Residents and community groups can let the county council know where they would like charge points to be located by registering their interest via this link. [Register Your Interest](#) .

The following link is to the home page of Connected Kerb, the UK's largest public EV charging project, where you can see FAQ and details on chargers and pricing.

Transport Plan

Despite the challenging budget a transport plan is being developed and will be consulted on over the next few weeks and then published.

There is evidence of increasing interest in reducing speeds and providing more and better facilities for cycling and walking. The Cabinet Member for Highways and Infrastructure would in particular like to pilot a "Quiet Lanes" project in this area.
